

# Looking for more value in your corn?

# Find it with NutriDense® Grain

## Contract to grow nutritionally enhanced NutriDense corn hybrids and lock in more value from your corn.

Now is the time to grow NutriDense corn and take hold of an opportunity before it passes you by. Contract to grow NutriDense today, and you'll also receive a premium for each bushel you sell. Make this season one for the books.

## What is NutriDense?

It's a nutritionally enhanced corn, available in competitive yielding hybrids, that provides a lower cost per pound of gain for swine and poultry producers! This provides the animal producer with more efficient meat production and allows the grain grower to share in a portion of that value in the form of a grain premium.

NutriDense hybrids offer competitive yield and agronomics and are available from licensed seed companies with many popular input traits.

## Save \$65/unit with NutriDense.

Why should you sign up for a NutriDense delivery contract? Because you'll receive a signed voucher for a discount of \$65 per unit on a qualifying NutriDense seed purchase. How does it work? Sign a NutriDense Grain contract with a participating grain contractor. You'll then receive a voucher redeemable for \$65 off per unit on NutriDense Grain hybrids. Redeem that voucher with a local NutriDense Grain seed partner when you order your seed and you'll save \$65/unit. It couldn't get much easier than that. For complete details, visit [www.nutridense.com/grain](http://www.nutridense.com/grain).

## Contract today.

NutriDense buyers call contracts offer a number of attractive features:

- With an acreage-based contract, you sell what you grow
- Local delivery available for your convenience
- Premiums paid per bushel

## Be a part of the NutriDense Grain network.

The NutriDense network consists of local seed partners, local grain contractors, livestock producers and BASF Plant Science, all working together to help grow your business. Now all we need is you.

## Get Started.

To learn more about NutriDense corn hybrids and grain contracting opportunities available in your area, talk to a NutriDense seed partner or visit [www.nutridense.com/grain](http://www.nutridense.com/grain).

*"As far as comparative yields, this year we had just over 200 acres, and it was my top-yielding crop ... I was really impressed with it. It's kind of a perfect marriage between the demand on the crop and the ease of producing it."*

— Thomas Graham  
Washington, IN, 2010
