

Biography

July 2011

Dan Moore, Ph.D.

Manager, Animal Nutrition, Research and Development
BASF Plant Science L.P.
Research Triangle Park, NC

Professional career

Dr. Dan Moore received his B.S. degree in Animal Science and M.S. degree in Poultry Nutrition from the University of Missouri at Columbia. He completed his Ph.D. in Nutrition with a minor in Biotechnology from North Carolina State University in 2005. Dr. Moore is currently the manager of animal nutrition, research and development, in North America for BASF Plant Science L.P., the U.S. plant biotechnology division of BASF. BASF Plant Science focuses on optimizing crops through plant biotechnology for more efficient agriculture, for use as renewable raw materials and for improved health and nutrition.

Dr. Moore has an extensive background in animal research. Prior to joining BASF Plant Science in 2010, he was a poultry research and technical support manager at Diamond V, where he was involved in their global poultry research program. Additionally, Dr. Moore has worked on the USDA's National Animal Germplasm Program as an animal research physiologist and in many university research programs while completing his education.

In his current role at BASF Plant Science, Dr. Moore focuses on nutritional research and development as well as interacting with key accounts to ensure continued improvement.
